

FLOATING LAMPS//
Lighter than Light

SILHOUETTE # 1

FLOATING LAMPS// *by crealev.*

DESIGN

Angela Jansen has reinvented the standard lamp. The design evokes memories of old fashioned lamps, but when you see the floating part, you realize this is designed for the future.

APPEARANCE

The lamp consists out of a handcrafted wooden base with a high glossy black finish. Attached is a stylish black fabric covered power cable. The conical shaped lampshade is manufactured in matt black fabric with a pearl white furnishing inside. The light flows through the openings of the mirror which covers the lower part of the lampshade.

TECHNOLOGY

What makes this lamp floating is the integrated levitation technology. It consist out of electromagnetic components and a sophisticated control system. Next to the fact that they employ the very latest LED technology, the lamp is low in power consumption too. With a touch of your fingertip, the lamp can be dimmed to the intensity you require.

SPECS

The lamp is 62,5 cm high and weighs 4 kg. The fabric covered power cord is 2.00 meters long (6,5 feet) and is connected to the universal power adaptor with a power cable with the length of 1.85 meters (6 feet). Light intensity: 300 Lux.

ELECTRICAL REQUIREMENTS

Rated input voltage: 110-240V
Rated frequency: 50/60 Hz
Rated input power: 3Watt at standby
Rated input power: 15Watt when the LEDs are fully on

Standard european plug, foreign plugs available on request

PRICE

Euro 1290,- excl. VAT

GENERAL DESCRIPTION

A: Upper part lampshade,
with levitated integrated
magnetic carrier ring

B: Lower part lampshade
with integrated levitation
and lighting technology

C: Power dimmer touch button

D: Foot

E: Adapter
